DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4-6 and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Bergstrom.

Bergstrom shows a fuel injector as recited comprising:

- a seat 20 including a passage 26 extending along a longitudinal axis;
- a movable member 18 as recited; and
- a metering orifice disc including a member 22 having first and second generally parallel surfaces, the first surface generally confronting the seat and the second surface facing opposite the first surface and an orifice penetrating the member and being defined by a wall coupling the first and second surfaces, the wall including a first portion spaced from the first surface, the first portion of the wall extending substantially perpendicular to the first and second generally planar surfaces and a second portion coupling the first portion to the first surface, the second portion of the wall extending at a first oblique angle with respect to the first surface and the first oblique angle varying with respect to the longitudinal axis (see Figure 4 attached herein).

The methods recited in claims 16-18 are also shown by Bergstrom

Allowable Subject Matter

3. Claims 2, 3, 7-15, and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
